

soul red

a heart-healthy, super supplement.

2oz of dna-supporters.

what is soul red?

SOUL Red is a powerhouse of health, specifically designed by science to improve your body's function and performance. In just 2oz, we pack a massive amount of antioxidants, vitamins and minerals, and other body-boosting nutrients inside a drinkable, convenient packet. How? SOUL Red is seed-powered and all-natural.

how does soul red help your body?

We created SOUL Red to be as benefit-heavy as possible. Its unique, synergistic profile allows it to improve heart health, fight against environmental oxidation, all while boosting your immune system. It also works to help you feel younger by reducing inflammation, increasing your energy levels, and improving cellular function.

soul red fuels you better.

soul red - made with you in mind.

key ingredients

black cumin seed: One of the most widely-used seeds in the world. Its high antioxidant concentration, vitamin and mineral profile, as well as chemical compounds make it a powerhouse that's both scientifically and historically-backed.

red raspberry seed: Known for its robust phytonutrient profile, the raspberry seed has the power to fight oxidation, reduce inflammation, and give the body high doses of vitamin C and D.

grape chardonnay seed: If the fruit is healthy, the seed is even healthier. Each grape chardonnay seed contains enormous amounts of antioxidants, vitamins, and other anti-aging compounds.

d-ribose: This energy source is typically created naturally within the body. But, we've added this compound to our SOUL ingredient deck to provide more cellular energy for better performance, replication, and recovery.
